Overview

Professional Drip Coffee Brewing

This electric drip coffee maker offers a reliable solution for brewing high-quality coffee in both home and office environments. Featuring a generous 1.25L capacity, it can produce 10-12 cups per batch, making it ideal for groups. The design emphasizes durability and ease of use, incorporating a stainless steel and plastic dual-housing construction with convenient features like a non-drip valve and a programmable timer.

Technical Specifications

Capacity	1.25 L
Cup Yield	10-12 cups

Design & Build

Construction Materials	Stainless Steel, Plastic
