

Electric Drip Coffee Maker with Stainless Steel Carafe

This electric drip coffee maker is designed for household kitchen use. It features a stainless steel carafe to maintain coffee temperature after brewing.

Product Overview

Professional Brewing Performance

The CMJ-2009A drip coffee maker combines classic design with robust construction, featuring extensive stainless steel accents for durability and style. It is equipped with a high-quality, double-walled stainless steel thermos carafe designed to keep coffee hot without compromising flavor. This unit is an ideal solution for consistent, reliable brewing in professional or high-demand environments.
