

Electric Drywall Sander with Dust Collection

This electric drywall sander is designed for sanding drywall and plaster walls and ceilings. It features a pivoting sanding head and a dust collection system to minimize airborne particles.

Product Overview

Professional Drywall Finishing Tool

This electric drywall sander is a versatile power tool engineered for efficient sanding of both drywall and plaster surfaces on walls and ceilings. It incorporates a specialized dust collection system to significantly reduce airborne particles during operation, promoting a cleaner workspace. With a pivoting head, variable speed control, and a telescopic handle, it offers the maneuverability and reach required for professional-grade surface smoothing and preparation.

Key Features

Functionalities

- Pivoting sanding head for enhanced maneuverability
- Integrated dust collection system
- Variable speed control for adaptable sanding
- Telescopic handle for extended reach

Applications

Suitable For

Painting Preparation • Wallpapering Preparation

Primary Applications

Drywall Sanding, Plaster Smoothing, Surface Preparation, Removing Imperfections
