

Electric Engraving Pen

Electric engraving pen with variable stroke control allows for precise carving and etching on various materials. Its lightweight, ergonomic design ensures comfortable handling.

Product Overview

Precision Electric Engraving Solution

This electric engraving pen is engineered for high-precision carving and etching across a wide range of materials. Featuring variable stroke control, it allows users to achieve exact results for both delicate artistic projects and industrial marking. The lightweight, ergonomic design is optimized for comfortable handling, making it suitable for extended professional use without fatigue.

Technical Features

Stroke Control

Variable control for precise carving and etching depth
