Product Overview

Professional Fabric Cutting Solution

This high-efficiency electric cutting machine is designed for both household and industrial use, offering precise cutting capabilities for a wide range of materials including textiles, leather, and cardboard. Equipped with a durable tungsten steel blade and a versatile dual-power system, it supports both continuous corded operation and portable battery-powered use. Its lightweight, ergonomic design helps reduce operator fatigue, making it an ideal tool for textile, garment, and upholstery manufacturing environments.

Technical Specifications

Power & Performance

35 W

Output Power

2 hours

Charging Time

Material Cutting Capacity

Material Type	Max Thickness
Cloth, textile, knitwear, felt, blanket	10mm
Cardboard, paper	7mm
Leather, carpet, plastic	5mm

Blade Material

Tungsten steel

Machine Weight

0.376 KG

Features

Operating Modes

- Corded (continuous operation)
- Battery-powered (portable)

Common Applications

Garments, Textiles, Leather Goods, Upholstery, Packaging
