

Electric Facial Cleansing Brush with Rotating Head

This electric facial cleansing brush is designed for deep and gentle skin exfoliation. It features a rotating brush head with soft bristles and multi-speed control for customized cleansing.

Overview

Professional Deep Cleansing Solution

This electric facial cleansing brush features a high-performance rotating head designed for deep exfoliation and gentle skin care. Equipped with a dual-speed control system and an intelligent auto-timer, it ensures a consistent and professional cleansing routine. The cordless, water-resistant design combined with a digital LED display makes it an essential tool for modern skincare maintenance.
