Product Overview

High-Security Perimeter Protection

This electric fence system is engineered for robust perimeter security in residential areas, schools, and commercial sites. The front-end components are designed for high pressure resistance and anti-aging performance to ensure a long service life. It provides a reliable deterrent against intruders while offering flexible installation options to suit various enclosure conditions.

Technical Features

Durability & Resistance

High Pressure Resistance, Pollution Resistance, Oxidation Resistance, Corrosion Resistance, Anti-aging

System Components

Included Components

- Terminal rod
- Load-bearing rod
- Wire crossing rod
- Insulators for each rod
- Alloy fence wire
- Warning board
- Wire tightening device

Installation & Application

Installation Features

Easily Assembled • Strong Flexibility • Floor Installation Compatible • Auxiliary Installation Compatible

Ideal For

Living Areas, Schools, Security Boundaries

Manufacturing & Service

Service Options

- OEM Customization
- Logo & Branding Design
- Custom Packaging
- Sample Supply

Production Experience

9 years

Logistics
