

Electric Fireplace with Adjustable Flame

This electric fireplace provides two levels of heating power: 1000W and 2000W. It features thermoregulation, safety overheat protection, and an adjustable flame for a vivid impression.

Overview

Elegant Heating Solution

This electric fireplace offers a sophisticated European-style design that adds a decorative touch to any room while providing efficient supplemental heat. It features a realistic flame effect with adjustable settings to create the perfect ambiance without the mess of wood or gas. Built with safety and convenience in mind, it includes rapid heating capabilities and overheat protection for peace of mind.
