

Electric Firewood Cutting Saw

This electric firewood cutting saw is designed for efficient and safe wood processing. It features a durable steel frame with an enclosed cutting area and safety guard.

Overview

Professional Wood Processing

The CL700 Fire Wood Cutting Saw is a robust machine engineered for efficient and safe wood processing in professional environments. Featuring a durable steel frame with a corrosion-resistant powder-coated finish, it is built to withstand high-volume usage. It includes essential safety mechanisms such as an enclosed cutting area, spring-loaded safety guard, emergency stop switch, and overload protection, making it an ideal choice for farms and wood yards.

Technical Specifications

Power Source	Electric Motor
Safety Features	Emergency Stop, Overload Protection, Spring-loaded Guard, Enclosed Cutting Area

Design & Build

Transport Features

- Convenient handle
- Integrated wheels

Frame Construction	Steel with blue powder-coated finish
Mobility	Yes

Applications

Recommended Applications

Professional Wood Yards • Farms • High-Volume Processing
