

# Electric Foot Massager with Kneading and Heat

This electric foot massager uses two massage nodes to provide targeted relief. It features adjustable intensity levels and a heating function to soothe tired feet and promote improved circulation.

## Product Overview

### Professional Massage Solution

This electric foot massager features a streamlined, upscale design finished with high-grade metal paint, making it a sophisticated addition to any wellness space. Engineered with advanced micro-computer control, it offers multifunction massage programs and far-infrared heating to effectively promote blood circulation. Designed for versatility and hygiene, it targets key areas including the waist, buttocks, and legs, and features a user-friendly, removable, and washable cover.
