

Electric Forced Air Space Heater

This electric space heater features motor thermal protection and a stable steel frame. The unit has a stainless steel heating element, adjustable air outlet angle, and optional ventilation or heating function.

Product Overview

Exceptional Heating Performance

This industrial-grade electric forced air space heater is designed to create a comfortable environment in demanding settings like workshops, job sites, and garages. With a powerful 3000-watt output, it efficiently distributes heat across wide areas. Built with a heavy-gauge steel body, this portable heater ensures durability and lasting performance for professional use.

Technical Specifications

Power Output

3000 W

Heating Capacity

Voltage	208/240V
Heating Method	Fan-forced air

Compliance & Quality

Compliance

ETL-Compliant

Certifications	ETL, UL, SAA, CE, NOM
----------------	-----------------------

Design & Build

Ideal Environments

- Garages
- Workshops
- Offices
- Industrial spaces
- Job sites

Body Material	Heavy-gauge steel
