Product Overview

High-Efficiency Electric Stacker

This heavy-duty electric fork-over stacker is engineered for reliable material handling in demanding warehouse and dock environments. Featuring a powerful AC drive motor and electric power steering, it offers smooth, precise operation with reduced emissions for indoor use. Advanced safety systems, including automatic speed control and lifting height limitation, ensure operator protection and operational longevity.

Technical Specifications

Motor Type	AC Drive Motor
Available Models	ES12, ES15, ES20

Safety & Control

Safety Mechanisms

- Lifting height limitation switch
- Automatic stop at top height
- Cornering speed control
- Automatic speed reduction when turning
- Speed limit to 2km/h when forks are elevated

Design & Construction

Design Features

- Side pull battery replacement design
- Fold-able platform
- Protecting arms
- Metal cover body for extended lifetime

Performance Metrics

500 mm

Critical Lift Height

2 km/h

Restricted Travel Speed
