Overview

Versatile Electric Material Handling

This electric forklift is a robust and eco-friendly solution engineered for both indoor and outdoor material handling. Featuring a lifting capacity ranging from 1.5 to 4 tons, it is designed for optimal maneuverability in tight spaces such as warehouses, factories, and distribution centers. Its battery-powered system ensures zero emissions and quiet operation, providing a sustainable and cost-effective alternative to traditional internal combustion engine forklifts.

Performance

Lifting Capacity

1.5 ton

Minimum Capacity

4 ton

Maximum Capacity

Power Source

Battery-powered

Features

Safety Equipment

- Overhead guard
- Lighting system
- Load sensors
- Stability control
- High-visibility mast

Suitable Environments

Indoor, Outdoor, Warehouse, Manufacturing, Logistics, Distribution

Design

Design Highlights

Compact chassis • Ergonomic cabin • Zero emissions • Quiet operation
