

# Electric Fuel Pump for Hyundai

This electric fuel pump is designed for automotive fuel delivery. It provides consistent fuel pressure and flow for optimal engine performance.

## Overview

### High-Performance Fuel Delivery

This electric fuel pump is engineered to provide consistent fuel pressure and flow, ensuring optimal engine performance for compatible vehicles. Each unit is precisely manufactured and undergoes rigorous testing to meet or exceed OEM specifications for fit, form, and function. Designed for reliability, this component is a dependable solution for automotive fuel delivery systems.

## Performance Metrics

### Operating Pressure

**3 Bar**

Operating Pressure

### Flow Rate

**135 L/h**

Flow Rate

## Compatibility

OEM Cross Reference	31112-1A600
Compatible Make	Hyundai

## Certifications

Compliance & Standards	TÜV, ISO/TS 16949:2002, CE
