

Electric Fuel Pump Module for Chevy and GMC

This electric fuel pump module is a complete assembly including the fuel pump, fuel level sensor, and fuel filter. It provides a reliable and consistent fuel supply to the engine and is designed for direct replacement in Chevy and GMC vehicles.

Overview

High-Performance Fuel Delivery

This electric fuel pump module is precision-manufactured and rigorously tested to ensure reliable and consistent fuel supply to the engine. Designed as a direct replacement for original equipment, this complete assembly includes the fuel pump, fuel level sensor, and fuel filter. It meets national standards for automobile electric fuel pumps, ensuring optimal performance and durability for compatible vehicle applications.

Performance Specifications

Operating Pressure

0.3 Bar

Pressure

Flow Rate

130 L/h

Flow

Compatibility

Cross Reference

Manufacturer	Part Number
AIRTEX	E3966M
ACDELCO	MU162

Compatible Vehicles

CHEVY, GMC

Quality & Standards

Certifications

TUV • ISO/TS 16949:2002 • CE

Manufacturing Details

Production Capabilities

- 14 pump assembly lines
- 4 module assembly lines
- Output capacity: 18,000 units per day
