

Electric Fuel Pump Module for Honda

This electric fuel pump module is designed for Honda vehicles, ensuring reliable fuel delivery. It provides consistent fuel pressure and flow, contributing to improved fuel efficiency and reduced emissions.

Product Overview

High-Performance Fuel Delivery

This electric fuel pump module is precision-engineered to ensure reliable fuel delivery and optimal engine performance for compatible Honda vehicles. Every unit undergoes rigorous testing to meet or exceed original equipment standards, guaranteeing consistent fuel pressure and flow. Designed for durability and ease of installation, this module includes essential components like the fuel filter sock to support improved fuel efficiency and reduced emissions.

Technical Specifications

Operating Pressure	3 Bar
Flow Rate	85 L/h
Cross Reference	BOSCH 0 986 580 901
Compatible Application	HONDA

Quality & Standards

Certifications

TUV • ISO/TS 16949:2002 • CE

Manufacturing Capabilities

Daily Output

18000 pcs

Daily Production

Product Variety

- 400 part numbers of pumps
- 300 part numbers of modules
