

Electric Fuel Transfer Pump

Self-priming electric transfer pump designed for the safe and efficient transfer of gasoline and other fuels. Features a robust motor, durable pump housing, and integrated handle for portability.

Product Overview

Professional Fuel Transfer Solution

This self-priming electric transfer pump is engineered for the safe and efficient handling of gasoline and various other fuels. Featuring a robust motor and a durable pump housing, it is built to withstand demanding operational environments. Its integrated handle design ensures high portability, making it an ideal choice for refueling vehicles, machinery, and equipment on-site.

Technical Specifications

Pump Type	Self-priming electric transfer pump
Power Connection	Standard plug power cord
Key Features	Self-priming, Portable, Durable Housing, Integrated Handle

Applications

Suitable Applications

- Vehicle refueling
- Machinery maintenance
- Equipment fueling
