

# Electric Garden Shredder for Waste Reduction

This electric garden shredder efficiently processes garden waste like branches, twigs, and leaves. It features a powerful motor, safety interlock system, and collection box for convenient waste disposal.

## Product Overview

### Efficient Garden Waste Management

This electric garden shredder is engineered to streamline waste management by processing branches, twigs, and leaves into manageable mulch. Designed for professional or residential garden maintenance, it combines a high-performance motor with a robust cutting mechanism to ensure durability and efficiency. Its integrated safety systems and ergonomic mobility features provide a user-friendly experience for reducing bulky garden debris.

## Technical Specifications

### Key Features

- Powerful motor for effective shredding
- Robust cutting mechanism
- Safety interlock system
- Large capacity collection box
- Compact, mobile design with wheels

### Target Materials

Branches, Twigs, Leaves

## Compliance and Usage

### Safety Standards

Safety Interlock System, Overload Protection
