

Electric Generator Motor

High-performance generator motor designed for efficient power transmission and distribution. This robust motor is engineered for demanding industrial applications, ensuring reliable and consistent operation.

Overview

High-Performance Generator Motor

This high-performance generator motor is engineered for efficient power transmission and distribution in demanding industrial applications. Designed to ensure reliable and consistent operation, it features robust construction, optimized thermal management, and precise control capabilities. It is a versatile solution suitable for a wide range of electric power generation systems.

Technical Specifications

Unit Capacity

450 MVA
Max Capacity

Rated Voltage	20 kV
Voltage Limit	d20V
