

Electric Glass Kettle with LED Illumination

This electric kettle features a transparent glass body with blue LED illumination. It has a plastic handle and base, and clear water level markings.

Product Overview

Modern Glass Kettle

This electric glass kettle combines modern aesthetics with functional design, featuring a transparent body illuminated by blue LED lighting during operation. With a generous 1.8L capacity, it is designed for efficient boiling and easy water level monitoring. The durable construction includes a sleek combination of white plastic and brushed metal accents, making it a stylish addition to any kitchen or office pantry.
