

Electric Golf Cart with Canopy

This electric golf cart features a 500W motor and an electric brake system for reliable stopping power. Its compact design and electric operation make it ideal for navigating golf courses and other recreational areas quietly and efficiently.

Overview

Efficient Mobility Solution

This electric golf cart offers a reliable and quiet transportation solution for golf courses and recreational environments. Equipped with a robust 500W motor and an electric brake system, it ensures both performance and safety during operation. The inclusion of a protective canopy and ergonomic seating makes it a comfortable choice for navigating various terrains efficiently.

Performance Metrics

Motor Power

500 W

Motor Power

Maximum Speed	12.43 mph
Maximum Range	18.64 km
Maximum Load Capacity	300 lb

Battery & Power

Battery Configuration

- 28Ah Capacity
- 3 x 12V Battery System

Input Voltage Range	110V-220V
Charging Period	6-8 hours

Technical Details

Braking System

Electric Brake

Transmission Type	Chain Drive
