

Electric Gooseneck Kettle with Temperature Control

The electric gooseneck kettle is designed for precise pouring, ideal for pour-over coffee and tea preparation. Its gooseneck spout allows for controlled water flow, ensuring optimal extraction and flavor.

Overview

Professional Precision Brewing

This electric gooseneck kettle is engineered for precise water flow control, making it an essential tool for professional pour-over coffee and tea preparation. Combining a rapid-boil heating system with an ergonomic design, it offers both performance and comfort for frequent users. Its compact 0.7L capacity and elegant finish make it a perfect addition to modern kitchen setups or professional coffee bars.

Technical Specifications

Rated Power	1000 W
Rated Voltage	220 V
Rated Frequency	50 Hz
Rated Capacity	0.7 L

Dimensions and Weight

Weight	1.5 KG
Product Dimensions	260*145*190mm

Features

Key Features

- Gooseneck spout for precise flow control
- Rapid boil function
- Automatic shut-off safety feature
- Ergonomic handle design
