

# Electric Gooseneck Teapot with Temperature Control

This electric teapot is designed with a gooseneck spout for precise pouring and a sleek, modern aesthetic. It features a precision temperature control system, allowing users to select the optimal brewing temperature.

## ADDITIONAL IMAGES

## Product Overview

### Precision Brewing Performance

This electric gooseneck teapot is engineered for precision and convenience, featuring a 1510W high-power heating system that ensures rapid boiling. Designed with safety and user experience in mind, it includes an anti-overflow mechanism, automatic protection against dry running, and a smart lift-off shutoff feature. The sleek, modern aesthetic combined with food-grade 304 stainless steel construction makes it a reliable addition to any professional or high-end kitchen environment.

## Technical Specifications

### Heating Power

**1510 W**

Power Output

### Material Quality

Food Grade 304 Stainless Steel

## Key Features

### Smart Control Features

- Inverter and constant temperature control
- One-key water heating
- Real-time temperature adjustment
- Automatic shutoff upon lifting
- Anti-overflow design

## Safety & Design

### Safety Protections

Auto-protection (dry run) • Anti-overflow • Leakage prevention

### Design Highlights

- Gooseneck spout for precise pouring
- Concealed water outlet
- Matte finish with gold accents
- Digital temperature display base
