

Electric Grill with Non-Stick Surface

This electric grill features a non-stick surface with raised diamond patterns for grilling and fat drainage. It has integrated handles and a detachable base, ensuring even heat distribution and easy cleaning.

Product Overview

Professional Electric Grilling Solution

This electric grill is designed for efficient, consistent cooking with a specialized non-stick surface featuring raised diamond-shaped patterns. The design prioritizes both performance and maintenance, offering integrated handles for safe handling and a detachable base for simplified cleaning. With precise temperature control, it provides the versatility needed for a wide variety of food types.

Cooking Performance

Surface Type	Non-stick with raised diamond-shaped patterns
Heat Distribution	Even heat distribution for consistent results
Control Method	Temperature control dial

Design & Maintenance

Maintenance	Easy to clean • Detachable components
Handling Features	Integrated handles, Detachable base
