

Electric Hand Blender with Turbo Function

This electric hand blender features a DC motor for efficient blending and low noise operation. It includes a turbo function, power regulator, slim ergonomic handle, hanging loop, and soft-touch switch with 2-speed settings.

Product Overview

Versatile Kitchen Processing

This electric hand blender is designed for efficiency and ease of use in professional or home kitchens. Featuring a 280W DC motor with low-noise operation, it offers precise control through a power regulator and two speed settings. The set includes essential attachments like a stainless steel whisk, a 500ml chopper, and a 600ml measuring cup, making it a comprehensive tool for blending, whipping, and chopping.
