

# Electric Hand Planer for Woodworking

The electric hand planer is a power tool designed for smoothing and shaping wood surfaces. It features a high-speed rotating blade that removes thin layers of wood, allowing for precise adjustments to the cutting depth.

## Product Overview

### Professional Woodworking Performance

This electric hand planer is a robust power tool engineered for smoothing and shaping wood surfaces with high precision. It features a high-speed rotating blade mechanism that efficiently removes thin layers of material, allowing for accurate depth adjustments in carpentry and furniture making. Designed with both a front depth control handle and a rear handle, it ensures comfortable and controlled operation for the user.

## Key Features

### Primary Applications

- Woodworking Projects
- Carpentry
- Furniture Making
- Surface Smoothing

### Safety Features

Blade Guard, Lock-on Switch

## Operation

### Control Design

Front Depth Control Handle • Rear Handle Grip
