

Electric Hand Planer for Woodworking

The electric hand planer is designed for smoothing and shaping wood surfaces. It features a high-speed rotating blade system enclosed within a sturdy housing and allows for adjustable cutting depths.

Product Overview

Professional Woodworking Performance

This electric hand planer is a specialized power tool engineered for efficient smoothing and shaping of wood surfaces. Featuring a high-speed rotating blade system housed in a durable metal and plastic frame, it offers the precision required for demanding woodworking projects. With adjustable cutting depths and an ergonomic grip, it provides the control necessary for accurate material removal in construction and renovation tasks.

Technical Specifications

Cutting Capabilities

- Adjustable cutting depth
- High-speed rotating blade system
- Precise material removal

Safety Features

Trigger Lock, Enclosed Blade System
