

Electric Hand Planer for Woodworking

The electric hand planer is a power tool designed for woodworking, specifically for smoothing and shaping wood surfaces. It features a high-speed rotating blade that removes thin layers of wood with each pass, allowing for precise adjustments to achieve the desired thickness and smoothness.

Overview

Precision Woodworking Performance

This electric hand planer is a professional-grade power tool engineered for efficient wood surface smoothing and shaping. Featuring a high-speed rotating blade system, it allows for precise material removal, making it an essential tool for leveling surfaces, trimming doors, and refining edges. With an integrated depth adjustment knob and a sturdy, stable base, it ensures consistent results for demanding woodworking projects.

Technical Specifications

Key Features

- High-speed rotating blade system
- Adjustable depth control knob
- Stable base plate design

Tool Type	Electric Hand Planer
Primary Applications	Smoothing, Shaping, Trimming Doors, Leveling Surfaces, Edge Finishing
