Product Overview

Professional Performance in a Handheld Design

This electric handheld paint sprayer is engineered to provide consistent and efficient spray performance for a variety of coating applications. Its compact and portable design makes it suitable for both professional touch-up tasks and small-scale surface finishing. Equipped with a reliable motor and generous reservoir, it offers the convenience and precision required for high-quality results.

Technical Specifications

Power Input	600 W
Operating Voltage	110V-60Hz
Reservoir Capacity	800 ml
Nozzle Diameter	2.5 mm
