

# Electric Height Adjustable Standing Desk

This electric standing desk features a dual motor and three-stage frame, allowing vertical adjustments from 620-1250mm. The double motor ensures stable lifting, accommodating various standing height preferences for comfortable work throughout the day.

## ADDITIONAL IMAGES

## Overview

### Ergonomic Performance

This dual-motor electric height-adjustable desk is engineered for professional environments, offering smooth, quiet transitions between sitting and standing positions. With a robust steel frame and a three-stage lifting system, it provides exceptional stability and a generous lifting capacity of 80kg. Designed for versatility, the desk features programmable memory presets and an anti-collision sensor to ensure a safe, efficient, and comfortable workspace tailored to your specific ergonomic needs.

## Technical Specifications

Lifting Speed	35 mm/s
Noise Level	50 db
Maximum Load	80 kg
Height Adjustment Range	620 - 1250mm
Input Voltage	110/240V
Column Segments	3

## Design & Materials

### Available Desktop Widths

- 1200mm
- 1400mm
- 1600mm
- 1800mm

Desktop Material	MDF with melamine coating
------------------	---------------------------

## Features

### Certifications

UL • ROHS • CE • GS

### Core Features

Dual Motor, Anti-collision Sensor, Programmable Memory, Adjustable Foot Pads
