

Electric High-Pressure Washer

This is a compact electric high-pressure washer with a durable frame and handle. It is designed for various cleaning applications requiring pressurized water.

Overview

Professional Cleaning Performance

This electric high-pressure washer utilizes a high-pressure plunger pump to generate powerful water streams, making it a scientific and environmentally friendly cleaning solution. Designed for versatility, it is ideal for maintaining motor vehicles, motorcycles, and building exteriors. Its robust design is particularly effective at removing stubborn dirt, oil stains, and grime from hard-to-reach areas like corners, windows, and floors.

Certifications & Compliance

Certifications

ETL, CE

Key Features
