Overview

Professional High-Speed Bowl Cutter

This electric high-speed food bowl cutter is an essential tool for commercial food processing, designed for efficiency and durability. Featuring a robust aluminum alloy body with an anodized surface, it resists rust and corrosion, while the high-quality stainless steel blades and bowl ensure hygiene and longevity. With its S-shape blade design, this machine delivers rapid, consistent results, making it ideal for preparing sausages, meatballs, meat pies, and various vegetable mixtures.

Construction & Design

Body Material	Aluminum alloy with anodized surface treatment
Blade Material	High-quality stainless steel
Blade Configuration	S-shape stereoscopic blade

Performance

Key Operational Benefits

- High-speed operation for instant chopping
- Labor and time-saving efficiency
- Easy-to-remove food plate for cleaning
- Rust and corrosion-resistant construction

Suitable Applications	Sausage, Bologna, Meatballs, Ham, Hot dogs, Meat pies, Vegetable processing
------------------------------	---

Safety & Control

Safety Features

- Lid interlock mechanism
- On/Off control panel
