Overview

Versatile Hitch-Mounted Cargo Solution

The Electric Hitch-Mounted Cargo Lift is a heavy-duty, motorized solution designed to streamline the loading and unloading of heavy items. Engineered for convenience and stability, it attaches directly to a vehicle's 2-inch hitch receiver and features a multi-tiered platform system adjustable to various heights. Powered by a 12V DC motor and controlled via remote, this lift provides a seamless transfer between ground level and truck bed height, making it an essential tool for efficient cargo management.

Performance & Capacity

Rated Lift Capacity

500 lbs
Lift Capacity

Lifting Range

36.5 inches

Technical Specifications

Motor System	12 Volt DC Motorized Cable Module
Receiver Bar Size	2 inches
