

Electric Hoist

This electric hoist is designed for lifting applications in various industrial settings. It features a robust frame and a powerful electric motor for efficient and reliable operation.

Product Overview

High-Performance Electric Hoist

This industrial-grade electric hoist is engineered for reliable lifting operations in demanding environments. Designed with a robust motor and high-tensile steel cabling, it offers consistent performance for material handling and equipment positioning. With multiple capacity configurations available, this unit provides the flexibility needed to match specific lifting requirements safely and efficiently.
