Overview

Reliable Hot Water Solution

This electric storage water heater is engineered for efficient and consistent hot water delivery in residential or commercial settings. Featuring an Incoloy 840 dry heating element and electrostatic dry powder enamel coating, it ensures longevity and durability. The unit includes advanced safety features such as overheat and anti-over-pressure protection, alongside user-friendly digital temperature controls.

Technical Specifications

Available Capacities

- 30L
- 50L
- 80L
- 100L

Heating Element	Incoloy 840 (Dry Heating Element)
Inner Tank Coating	Electrostatic dry powder enamel
Insulation	Overall PUF

Safety & Features

Safety Protections	Overheat Protection, Anti Over-pressure Protection, Thicker Magnesium Anode
Interface	Digital Display, Temperature Control Knob, Power Indicator, Heating Indicator
