Overview

Reliable Hot Water Solutions

This electric storage water heater is engineered for efficient and consistent hot water delivery in residential settings. It features advanced safety systems including overheat and over-pressure protection, ensuring long-term reliability. With a focus on energy efficiency through overall PUF insulation and a durable enamel-coated inner tank, it is an ideal choice for professional sourcing.

Technical Specifications

Available Capacities

- 30L
- 50L
- 80L
- 100L

ERP Class

Class C

Key Features

Safety Protections

Overheat Protection, Anti Over-pressure Protection

Construction

Electrostatic dry powder enamel coating, Thicker Magnesium Anode, Overall PUF Insulation

Certifications

Certifications

CE, CB, RoHS

Installation & Maintenance

Installation

Designed for easy installation and maintenance with bottom-mounted inlet and outlet connections.
