

Electric Household Fan

This electric fan is designed for household use and efficient air circulation. It features a cylindrical design with multiple horizontal grilles for optimal airflow.

Product Overview

Efficient Air Circulation

The FBT-9-40 is a specialized electric fan designed for effective household air circulation. Featuring a cylindrical design with horizontal grilles, it is engineered to optimize airflow within indoor living spaces. This ventilation unit is a practical solution for maintaining comfortable air movement in residential environments.

Design & Build

Form Factor	Cylindrical
Airflow Mechanism	Horizontal grille ventilation

Classification

Category	Air Conditioners, Ventilation Equipment, Household Appliances
