

Electric Hydraulic Log Splitter

This electric log splitter utilizes a robust hydraulic system to efficiently split firewood. It features durable steel construction, a powerful motor, and integrated wheels for easy transportation.

Product Overview

Efficient Electric Log Splitting

This portable electric hydraulic log splitter is designed to make firewood preparation effortless and reliable. Featuring a powerful 6-ton hydraulic system, it eliminates the need for gas engine maintenance, allowing for convenient plug-and-play operation. With its durable welded steel construction and integrated safety features, this tool provides a safe, controlled, and long-lasting solution for residential and light commercial log splitting tasks.

Technical Specifications

Splitting Force

6 ton

Force

Hydraulic Cylinder Diameter

60 mm

Power Source

Electric

Features & Construction

Portability Details

- Compact size
- Lightweight design
- Built-in wheels

Safety Features

Two-Hand Safety Control, Controlled Splitting

Construction

Welded steel construction with enclosed hydraulic ram

Portability

Yes
