

Electric Hydraulic Oil Pump Unit

This electric hydraulic oil pump is a mobile unit for easy maneuverability. It is suitable for powering hydraulic tools and equipment in various industrial applications.

Overview

High-Pressure Hydraulic Power Solution

The ZB(Y) series high-pressure electric pump is a robust, plunger-type unit designed to serve as a reliable power source for various industrial applications. Engineered for versatility, it effectively powers equipment such as prestressing jacks, extruders, and cotton gins. Its portable design, featuring integrated wheels, ensures easy maneuverability across job sites while maintaining the high pressure required for demanding industrial tasks.
