

# Electric Hydraulic Scissor Lift Table Cart

This electric hydraulic scissor lift table cart is designed for lifting and transporting heavy loads. It features a load capacity of 350/500 kg, operating current of 145A, and a 12V operating voltage.

## Product Overview

### High-Performance Hydraulic Lift Solution

The CYT-DE electric hydraulic scissor lift table cart is engineered for efficient material handling and heavy-load transport in industrial environments. Featuring a robust hydraulic system, it offers reliable lifting capabilities with precise control over ascent and descent speeds. Designed for ease of use and durability, this cart is an essential tool for streamlining warehouse operations and improving workplace safety.

## Performance Metrics

### Load Capacity

**500 kg**

Max Load Capacity

### Operating Speeds

Action	Duration
Lifting Speed	11 seconds
Lowering Speed	5 seconds

## Technical Specifications

### Power System

- Operating Voltage: 12V
- Operating Current: 145A
- Battery: 12V/80AH

### Working Pressure

25 MPa

## Dimensions

### Height Range

- Minimum Height: 440mm
- Maximum Height: 135mm

## Certifications

### Model Identification

Model: CYT-DE
