

Electric IC Card Reader

This electric card reader is compatible with various IC, magnetic and RF cards, including SIM cards. It features self-diagnosis functions and can perform card reading, writing, and management operations.

Overview

Versatile Electric Card Reader

This electric card reader is designed for high-reliability environments, supporting IC, magnetic, and RF card operations, including SIM card certification. It features built-in self-diagnosis capabilities and supports automated card handling functions like insertion, ejection, and swallowing. Ideal for self-service terminals, ATMs, and vending machines, this unit ensures seamless integration for secure data operations.

Technical Capabilities

Operational Functions

- Read/Write operations
- Self-diagnosis
- Card insertion
- Card ejection
- Card swallowing

Supported Card Types

IC Card, SIM Card, Magnetic Card, RF Card

Device Identification

Model Number

MT318-RIM-V2.0

Production Date

2011-05-06

Applications

Primary Applications

Self-service Terminals • ATM • Vending Machines • Multi-media Enquiries
