

Electric Ice Cream Maker with Removable Bowl

This electric ice cream maker features a removable freezing bowl and a motorized paddle. It is designed for home use, allowing users to create custom ice cream flavors.

Product Overview

Efficient Home Ice Cream Production

This electric ice cream maker is designed for convenient, batch-style frozen dessert production. Featuring a durable white plastic housing and a motorized churning paddle, it simplifies the process of creating custom ice cream flavors at home. The unit includes a removable freezing bowl, ensuring easy cleanup and preparation between batches.
