

Electric Immersion Hand Blender

This electric immersion hand blender is designed for efficient food processing and mixing. It features multiple attachments, including a plastic blending foot, a stainless steel shaft with a blending head, and a full stainless steel blending shaft and head.

Overview

Professional Immersion Blending

This electric immersion hand blender is engineered for efficiency and versatility in food preparation. Featuring a robust 450W DC motor and adjustable speed controls, it provides consistent power for various mixing tasks. The design prioritizes hygiene and convenience with a detachable stainless steel foot, making it an essential tool for professional kitchens.

Technical Specifications

Rated Power	450 W
Motor Type	DC Motor
Supported Voltage	220-240V 50Hz, 120V 60Hz

Performance & Control

Speed Control	2
Switch Type	Soft-touch switch

Design & Materials

Maintenance

Detachable Foot • Easy Cleaning

Housing Material	Stainless Steel
Blade Material	Stainless Steel
