

Electric Impact Wrench for Heavy-Duty Fastening

This high-torque electric impact wrench is designed for heavy-duty fastening applications. Its robust motor and durable construction provide powerful and efficient performance for tightening and loosening bolts and nuts.

Overview

Heavy-Duty Impact Wrench

This electric impact wrench is engineered for demanding fastening tasks in automotive, construction, and industrial environments. It features a robust motor capable of delivering high torque for efficient bolt tightening and loosening. Designed with ergonomics in mind, it ensures operator comfort during extended use while maintaining professional-grade reliability.

Technical Specifications

Rated Voltage	120V~/60Hz
Rated Input Power	8.5 A

Performance

Max Torque

200 FT/LBS
Max Torque

No Load Speed	2500 rpm
