

Electric Induction Cooktop with Bridge Function

This electric induction cooktop features bridge induction, allowing combined use of cooking zones. It has 9 power levels, sensor touch control, a child safety lock, and a timer for safe, convenient cooking.

Overview

Professional Induction Cooking Solution

This electric induction cooktop is engineered for efficiency and versatility in professional kitchen environments. Featuring advanced half-bridge design and quad-core heating coils, it ensures rapid, even heat distribution while minimizing energy consumption. The integrated bridge function and flexible cooking zones provide the adaptability needed for various cookware sizes and complex culinary tasks.

Performance & Technology

Power Features

- Quiet boost mode
- Energy-saving power management
