

# Electric Induction Cooktop with Ceramic Plate

This high-efficiency induction cooker features a ceramic plate surface and multiple cooking functions. It offers precise temperature control from 60°C to 240°C and power levels from 120W to 2100W.

## Product Overview

### High-Efficiency Induction Cooking

This electric induction cooktop features a durable ceramic plate surface designed for versatile professional and commercial cooking needs. It offers precise temperature and power control, making it suitable for a wide range of tasks from gentle simmering to high-heat stir-frying. With integrated safety features and an intuitive control interface, it provides a reliable solution for efficient kitchen operations.

## Performance Metrics

### Temperature Range

**60 °C**
