

Electric Induction Cooktop with Multi-Function Controls

This electric induction cooktop features an energy-efficient design and titanium finish. It includes multiple cooking functions such as stir-fry, barbecue, and hot pot, with a digital timer and smart voltage display.

Product Overview

Advanced Induction Cooking Technology

This high-performance induction cooktop is engineered for versatility and energy efficiency in demanding environments. Featuring an ultra-wide voltage range of 80V-280V and an innovative low-voltage start capability, it ensures consistent performance even in areas with unstable power grids. The titanium finish provides a durable and stylish exterior, while the integrated smart display allows for precise monitoring of energy consumption and voltage.

Technical Specifications

Operating Voltage Range	80V - 280V
Minimum Start Voltage	80 V
Maximum Temperature	300 °C
Timer Range	0-23 hours

Features

Cooking Functions

- Stir-fry
- Barbecue
- Hot milk
- Boiling water
- Cooking rice
- Soup/Porridge
- Hot pot

Key Features

Titanium Finish, Smart Eye Display, Energy Consumption Monitor, Voltage Display, Four-digit Display

Performance

Core Performance Metrics

300 °C

Max Temperature

80 V

Min Start Voltage
