

Electric Induction Cooktop with Timer and Multiple Cooking Functions

This electric induction cooktop features energy-saving technology, including an ultra-low voltage start. It offers five-stage firepower control, a timer, and multiple cooking functions.

Overview

High-Efficiency Induction Cooktop

This advanced induction cooktop is engineered for professional and domestic versatility, featuring a wide operating voltage range of 80V-280V to ensure reliable performance even in unstable power environments. It incorporates intelligent energy-saving technology and a 'smart eye' display that provides real-time monitoring of voltage and power consumption. With a durable titanium car paint finish and precise temperature controls, this unit offers both aesthetic appeal and robust functionality for a variety of cooking needs.

Technical Specifications

Voltage Range	80V - 280V
Firepower Control	300 °C
Timer Range	0 - 23 hours

Performance Metrics

Cooking Performance

300 °C Max Stir-Fry Temp	5 levels Firepower Stages

Features

Available Cooking Functions

- Stir-fry
- Barbecue
- Hot milk
- Boiling water
- Cooking rice
- Soup/Porridge
- Hot pot

Core Technologies

Ultra-low voltage start, Smart eye energy monitoring, Titanium car paint finish, Energy-saving certified
