

Electric Induction Cooktop

This electric induction cooktop is a modern kitchen appliance designed for efficient and precise cooking. It utilizes electromagnetic induction to directly heat cookware, providing rapid heating and precise temperature control.

Overview

Modern Induction Cooking Technology

This electric induction cooktop offers a modern, efficient solution for precise culinary tasks. Utilizing electromagnetic induction, it heats cookware directly for rapid temperature adjustments and consistent performance. Designed for safety and convenience, it features a durable, easy-to-clean glass surface and integrated protective mechanisms.

Technical Specifications

Rated Power

2200 W

Power Output

Model Identifier

F22-2201-01

Features & Safety

Cookware Compatibility

- Cast Iron
- Stainless Steel (Induction-ready)
- Ferrous Materials

Safety Protections

Automatic Shut-off, Overheat Protection, Child Lock

Design & Build

Surface Material

Ceramic Glass

Control Interface

Touch-sensitive
