

Electric Industrial Towing Head

This electric towing head is designed for moving heavy loads in industrial environments. It features a powerful electric motor and safety features such as emergency stop and overload protection.

Overview

Industrial Towing Efficiency

The Electric Industrial Towing Head is a robust and efficient machine engineered for moving heavy loads in demanding industrial environments. Its compact design ensures excellent maneuverability in tight spaces, while the powerful electric motor provides smooth, controlled towing operations. Designed with operator ergonomics and safety in mind, this unit includes essential features like emergency stops and overload protection to enhance productivity in warehouses, factories, and distribution centers.

Performance & Safety

Safety Features	Emergency Stop, Overload Protection
Power Source	Electric Motor

Design & Ergonomics

Design Highlights

- Compact design for tight spaces
- Ergonomic handle for operator comfort
- Heavy-duty construction for durability

Applications

Ideal Environments

Warehouses • Factories • Distribution Centers
